Motivated junior software engineer with a strong foundation in fullstack development. Proficient in backend development using various technologies including PHP, Golang, Python, and Java, with front-end skills in HTML, CSS, JavaScript, and frameworks like React and Tailwind. Experienced with databases such as MySQL, PostgreSQL, MongoDB, and Redis, and familiar with Docker and Git for version control. Demonstrated ability to build end-to-end systems, utilizing frameworks like Laravel, Fiber, Gin, Echo, and Spring Boot for backend, as well as modern front-end tools. Eager to contribute to a dynamic team and enhance my skills as a software engineer.

Education

Universitas Sumatera Utara – Medan, Indonesia   Sep 2020 – Jan 2024
Bachelor Degree in Computer Science, 3.72/4.00

- Thesis on "The Cryptanalysis of the M.S.H. Biswas (Rabin-Biswas) Algorithm using the Baby Step Giant Step Algorithm and the Ciphertext Only Attack Method"
- Experienced in various kinds of software development, such as web development, desktop-app development, and mobile-app development
- Relevant coursework: Data Structures & Algorithms, Design & Algorithm Analysis, Database Management Systems, Web Developments, Software Engineering

Technical Skills

- **Languages:** PHP, Golang, Python, Java, Javascript
- **Backend Frameworks:** Laravel, Yii, Fiber, Gin, Echo, Spring Boot
- **Frontend Technologies:** HTML, CSS, Bootstrap, React, Tailwind, Filament
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Messaging Queues:** Kafka
- **Authentication & Authorization:** JWT
- **Tools:** Git, Docker, Swagger, Postman

Projects

Portfolio Website | GitHub

- Developed a visually engaging portfolio website using React, Tailwind CSS, and GSAP, showcasing a clean, modern UI and smooth animations
- Utilized Tailwind CSS to achieve responsive design and streamline custom styling for optimal mobile and desktop experiences
- Integrated GSAP for dynamic animations, enhancing the website's interactivity and visual appeal
- Ensured component-based, reusable code in React for efficient updates and scalability

Point of Sales Web Application | GitHub

- Developed a comprehensive Point of Sales (POS) web application using Laravel, Filament, MySQL, and Docker
- Built an intuitive admin dashboard with Laravel Filament for efficient management of categories, products, employees, sales, and expenses
- Managed database interactions using MySQL, ensuring reliable data handling and maintaining the integrity of transactional records
- Deployed the application in a containerized environment using Docker, enabling easy scaling and streamlined management
- Ensured data accuracy and consistency through advanced validation and relationship management techniques

Experience

Balai Monitor SFR Kelas I Medan – Medan, Indonesia   Jun – Jul 2023
Full Stack Web Developer Intern

- Developed end-to-end solutions for web applications, ensuring scalability, performance, and reliability
- Collaborated with cross-functional teams to translate requirements into technical solutions
- Optimized and refactored code to maintain high quality and improve development efficiency

Certifcations & Additional Skills

- Google Data Analytics Professional Certification (2024) | .pdf
- Fluent in English (TOEFL ITP Score: 510) and native in Bahasa Indonesia | .pdf
